1

Handheld
Data Capture

Collect accurate measurements and layouts of a building using the ZEB Go or ZEB Revo RT - simple, accurate and easy to use.

2

Automatic
Data Processing

Connect your scanner to your computer and we will automatically process the data, detecting each floor.

3

Floorplans

You'll receive the information you need to create accurate, rapid floorplans. From there you can label, annotate or take measurements from the information.
